

# Clear Choice®

TRANSPARENT APPLICATION TAPE

THE FILM APPLICATION TAPE YOU WERE WAITING FOR HAS ARRIVED!

## THE WORLD TRANSFERS BETTER WITH RTAPE'S AT60n CLEAR CHOICE®

AT60n Clear Choice® Application tape assures excellent lamination, transfer and installation. The lamination process becomes easy as a result of the smooth unwinding, the absence of static charges and the lay-flat characteristics. Transferring goes faster because AT60n is tested and designed for gloss vinyls of all the major vinyl manufacturers. AT60n improves the installation process. The excellent water resistance of the acrylic adhesive allows for wet application without leaving any adhesive residue on the vinyl. AT60n will not build adhesion to vinyl when stored for extended periods. The clear polypropylene film aids to precise registration of multi-color overlays and the rigidity minimizes misalignment problems.

## SUPERIOR WATER RESISTANCE AND LOW STATIC

AT60n Clear Choice® eliminates rework because of the unique polymerization process of the acrylic adhesive. This superior technology assures the water resistance of the adhesive and helps reducing the static charges.

## AT60n ADVANTAGES

- **Static Free** - The superior adhesive reduces the static charges. This reduction improves the lamination process.
- **Water Resistant** - The unique polymerization process of the acrylic adhesive assures a water-resistant application tape. A better installation process is the result.
- **Clarity** - The transparency of the AT60n Clear Choice® aids precise registration.
- **Alignment** - The rigidity of the polypropylene film minimizes misalignment problems.
- **Versatility** - AT60n Clear Choice® is tested and designed for the gloss vinyls of all major vinyl brands.

## AT60n Clear Choice®

- STATIC FREE
- WATER RESISTANT
- CLARITY
- ALIGNMENT
- VERSATILITY
